

## Versatility and Performance

### FEATURES

FUSION® and Xtended Cutting Length™ are optional on many Gator Mulcher® 3-in-1 blades.

Versatility and performance sum up the patented Gator Mulcher® 3-in-1 mower blades from OREGON®. Whether you are bagging, mulching or side discharging, the airlifts at the ends of the blade deliver exceptional bagging and side-discharge performance without compromising mulching capabilities.

In most conditions, the Gator Mulcher® 3-in-1 mower eliminates the need for bagging and trips to the landfill.

Even small, single-blade walk-behind mowers benefit from the Gator Mulcher® 3-in-1 blade's mulching technology.

- Eliminates the need to bag clippings in most cutting conditions, saving time and money.
- Delivers excellent bagging performance when you need to bag.
- Mows faster at higher speeds than traditional mulching blades.
- Improved side discharge capabilities.
- Thicker blades provide additional strength and longer wear.

FEATURES	BENEFITS
OREGON® blades are precision straightened by computer, not by hand	<ul style="list-style-type: none"> <li>• Superior straightness and consistency</li> <li>• Removes human error</li> <li>• Cleaner cut, especially on multi-blade decks</li> <li>• Lower vibration – easier on the equipment and the operator</li> </ul>
All OREGON® blades are heat treated to optimize performance	<ul style="list-style-type: none"> <li>• Hardness from the core to the edge is consistent – the superior method to treat blades</li> <li>• Increased hardness without increasing brittleness and breakage</li> </ul>
OREGON® blades are manufactured using Statistical Process Control (SPC)	<ul style="list-style-type: none"> <li>• SPC ensures the consistency and quality of OREGON® blades</li> <li>• SPC ensures that all our standards for high performance and long blade life are met</li> <li>• OREGON® blades not only meet OEM specifications, OREGON® blades often are the OEM specification</li> </ul>
OREGON® offers more blades, to fit more mowers, and to do more jobs	<ul style="list-style-type: none"> <li>• Find the mower blade you need in the printed OREGON® catalog or online at oregonlookup.com</li> <li>• Thicker blades mean more strength and longer wear</li> </ul>
Gator Mulcher™ 3-in-1 Blades make a big difference — even on small, single-blade walking mowers	<ul style="list-style-type: none"> <li>• Eliminates the need to bag in most cutting conditions, saving time and money</li> <li>• Delivers excellent bagging performance when you need to bag</li> <li>• Mows faster at higher speeds than traditional mulching blades</li> <li>• Features improved side discharge</li> </ul>
Fusion® blades	<ul style="list-style-type: none"> <li>• The only blade with the patent pending Fusion® process incorporated into its cutting edges</li> <li>• The process “fuses” tungsten carbide material into the blade, not onto the blade</li> <li>• No need to change or resharpen Fusion® blades during the day – saves time and money</li> </ul>
Our X-tended Cutting Length™ feature delivers excellent cutting	<ul style="list-style-type: none"> <li>• Improved cutting efficiency</li> <li>• Up to twice the cutting length</li> <li>• Cuts and delivers mulching effect</li> </ul>
OREGON® is the leading source for blade information and assistance	<ul style="list-style-type: none"> <li>• In the OREGON® catalog you'll find a large selection of blades and helpful information</li> <li>• Use the contact information below for assistance by mail or online</li> </ul>
OREGON® is a world-class manufacturer	<ul style="list-style-type: none"> <li>• OREGON® products are sold in more than 130 countries</li> <li>• OREGON® plants, offices and distribution centers are located in eleven countries, on four continents</li> </ul>

 <p><b>WARNING</b> Failure to install lawnmower blades correctly can lead to excessive wear and premature failure, or to a blade working loose and being thrown from the mower causing property damage, injury to the operator or bystanders, or death. Follow ALL instructions for the proper installation of blades as shown in the operator's manual provided by the mower manufacturer.</p>		 <p><b>WARNING</b> Operating a mower with an excessively worn or damaged blade can lead to blade breakage and the throwing of one or more blade fragments from the mower at high speed causing property damage, injury to the operator or bystanders, or death. Inspect your blade before each day's use and replace ANY blade which has had more than 10% of its original width removed due to wear and sharpening, or that is cracked or damaged.</p>
