Patent Pending

Patent-pending features make PowerSharp® a major advance over other sharpening methods - past or present

As the chain moves through the bar-mount sharpener, the unique top-sharpening cutters contact the stone.

The guidance drive link works together with the cutter, cutter depth gauge, and depth gauge tie strap to provide the stability required to create a precision cutting edge.

The diamond-coated dresser link resurfaces the stone, ensuring flat cutter-to-stone contact.
